## Karan Johar to Prince Harry: Celeb memoirs to dive in as Britney Spears' sells million copies in first week

Britney Spears, the pop icon whose life has been under intense public scrutiny for years, recently released her long-awaited memoir, offering fans and curious readers a glimpse into her tumultuous life. The book quickly became a sensation, selling over a million copies within the first week of its release.

The memoir, titled *The Woman In Me*, provides a candid and unfiltered look into her struggles, triumphs, and the legal battles that have dominated her existence.

## **‘The problem for Pakistan in this ODI World Cup is that the fast bowling is struggling’: Wasim Akram**

Babar Azam’s decision to bowl first against New Zealand at the M Chinnaswamy Stadium backfired as his bowlers were taken to the cleaners by the Kiwis, who posted a commanding 401/6 from 50 overs in their high-stakes World Cup match on Saturday.

Pace spearheads Hasan Ali and Shaheen Afridi gave away from than 150 between them apart as the men in green did not have enough variations to counter the smooth Chinnaswamy pitch. Rachin Ravindra smashed 108 off 94 balls and Kane Williamson (95 off 79 balls) ran them ragged.

## **‘Choke? I doubt you would say that about India’: Temba Bavuma dismisses South Africa’s past**

South Africa captain Temba Bavuma had to navigate around familiar questions about the ‘choking’ tag before their high-profile clash against India at the Eden Gardens on Sunday. He paused as stifled laughter could be heard around the room, and conjured up his best poker-faced expression and answered.

“To choke? I don’t know how to answer that. I think if we come unstuck tomorrow, I don’t think it’ll be a matter of choking. I doubt you would say that about India as well if they come unstuck if they choke,” he said when asked if the tag was on the South African players’ mind before such an important game.

## **PV Sindhu provides injury update after French Open withdrawal: ‘Determined to come back firing on all cylinders’**

After a rare mid-match withdrawal in her career at the French Open last week, former world champion PV Sindhu said on Tuesday that scans revealed a niggle in her left knee and she has been advised a few weeks rest. Sindhu was leading 21-18 1-1 in her second-round match against Thailand’s Supanida Katethong but after receiving a medical timeout, she decided to pull out. It is possibly the first time in her long career that she has retired in a match as per information available of BadmintonStatistics

## **World Cup: Virat Kohli shatters romantics’ heart, but India keep vaulting into greatness**

Such has been India’s imperious march in this World Cup that pretty early in the piece, once Sri Lanka’s briefly-sparkling start with the ball was negated, the game had turned into a waiting for Virat Kohli’s 49th hundred. Every romantic cliché was waiting to be ticked off. Sachin Tendulkar in the stands, watching. tick. Tendulkar’s huge statue unveiled just a day before, tick. A long partnership with Shubman Gill, the man he would be passing on the batting baton that he acquired from Tendulkar, tick.

## Watch this space: Dinkinesh's space twin and how Jupiter could have killed Earth

Earlier this week, NASA's Lucy mission, after travelling nearly 480 million kilometres away from our planet, was set to take pictures of what scientists believed was one asteroid—Dinkinesh. But when the spacecraft flew past the celestial body at over 16,000 kilometres per hour, scientists discovered that it was actually two celestial bodies.

As it turns out, the first asteroid that Lucy visited turned out to be its first two asteroids. What astronomers so far observed as a single asteroid turned out to be a binary pair of two space rocks.

## Little money being made available to developing nations for climate adaptation, need at least ten times more: UN report

Despite rapidly increasing climate risks which necessitate greater efforts to adapt, the money being made available to developing countries for adaptation measures has been declining, and nowhere close to the scale of requirement, a new report by the United Nations has revealed.

In 2021, just about \$21 billion went to developing countries for adaptation projects, which was down about 15 per cent from the previous years.

## **Dust might have snuffed out the dinosaurs**

On a spring day more than 66 million years ago, an asteroid slammed into the sea just off the coast of modern-day Mexico. Known as the Chicxulub impact, it set off a global shock wave, earthquakes and megatsunamis that exterminated the nonavian dinosaurs and plunged Earth into a long and dark winter.

A study published Monday in the journal Nature Geoscience has uncovered a cause of this cold snap: dust.

# FAA completes safety review of SpaceX Starship, most powerful rocket ever

Elon Musk's SpaceX has gotten one step closer to the highly anticipated second test flight of its massive Starship launch vehicle. The United States Federal Aviation Administration (FAA) on Tuesday said that it has concluded the safety review of Starship after it exploded during its debut launch in April.

The FAA had ordered SpaceX to ground Starship, which is the most powerful rocket ever built, until it takes many corrective actions. This was because the launch vehicle's debut launch in April ended in an explosion.

## It's time to replicate T-Hub innovation model across India: Srinivasa Rao, CEO, T-Hub

Now as the CEO of T-Hub, Srinivasa Rao Mahankali is a key driver of the unique partnership between the Government of Telangana, the International Institute of Information Technology, the Indian School of Business and the National Academy of Legal Studies and Research and the private sector. T-Hub (Technology Hub), an award winning innovation intermediary and a business incubator based in Hyderabad, has the swankiest address in the city. A 10-storey T-shaped structure with a built up area of 5,85,000 sq. ft, T-Hub is touted as the world's largest technology incubator facility.

## **iPhone 15 saves the day for Apple as other segments slump in September quarter**

Apple smashed its September quarter earnings record on Thursday, thanks to the stellar performance of its iPhone 15 series, which outperformed its predecessor by a notable margin. However, the company's phone division was the only bright spot in an otherwise gloomy report, as all other segments saw declines in revenue and sales for the fourth quarter in a row, CNBC reported.

## **Intel announces initiative to boost laptop manufacturing in India, partners with local companies**

Intel is accelerating local manufacturing in India with a new collaboration with 8 local companies, a mix of both EMS and ODMs. The semiconductor chip manufacturer says it will equip these companies with the required knowledge to set up laptop manufacturing for both domestic and international demand.

The collaboration will see the production of “complete” entry-level laptops in India, with Intel sharing its knowledge about SMT lines, setting up a quality control process for components, and benchmarking of finished products.
