Philadelphia Has Finally Chosen a Design for Its Harriet Tubman Memorial, One That 'Evokes Her Power'

November 6, 2023

The city had gone back to the drawing board on the project after a public outcry. Philadelphia has put public art controversy in its rearview mirror, and is moving forward with its plans for a Harriet Tubman memorial, choosing a design by Alvin Pettit from the five finalist proposals following an open call.

The Frick Pittsburgh Is Facing Criticism for Postponing an Islamic Art Show Over the Middle East Conflict

November 7, 2023

Museum director Elizabeth Barker said the show was pushed back for fears it may be "insensitive."

The Frick Pittsburgh has issued an apology, assuring it will repair its relationships with the Muslim community after postponing an Islamic art exhibition over Israel's war against Hamas.

New Technology Shows Museum Visitors How Art Activates Their Brains

November 8,2023

Our appreciation of good art has always had an intangible and essentially unknowable quality. But now, everyday museumgoers may be able to get new insights into how their brains respond to what they see. The U.K.'s Art Fund has launched a project that visualizes brainwave activity in real-time to measure our reactions to different works of art. The initiative was piloted at the Courtauld Gallery in London earlier this month and will tour to select U.K. museums in 2024.

Visitors Take a Big Bite Out of Performance Artist Bobby Baker's Edible Installation at Tate Britain

November 9, 2023

Strolling through the door of a what appears to be a typical East London apartment, which has been transported onto the grounds of Tate Britain, visitors are met with a familiar domestic scene. A teenage daughter is lying on her bed listening to music, while her brother takes a bath. In the living room, their father is slumped in front of the television next to a baby resting in its cot, while their mother hovers near the kitchen. If anything is amiss, it could only be that the entire family is made out of meringue, cookies, and cake... and visitors are welcome to have a slice.

As Shanghai's West Bund Turns Ten, the City's Art Scene Faces a Turning Point—Comeback or Comedown

November 11, 2023

Despite relentless rainy weather and strong winter winds, art enthusiasts flocked to Shanghai Art Week this year to take in the more than 200 exhibitions organized by local museums and galleries. The week was capped by the opening on November 9 of the city's two major art fairs, West Bund Art & Design and ART021 Shanghai Contemporary Art Fair. As the city showcased its vibrant and energetic art scene, stakeholders used the occasion to check in on the sizeable market's potential after the setbacks of recent years.

Asian Champions Trophy: Captain Savita Punia steps up as India emerge champions after near-perfect week with 4-0 win against Japan

November 6,2023

Savita Punia did not have much to do in the early part of the Asian Champions Trophy in Ranchi. It would not be an exaggeration to say she had to work harder in the pre-tournament press conference where she was bombarded with questions than in the first two matches against Thailand and Malaysia. On Sunday, on the night of the final, the Indian captain came up with a massive performance as India defeated Japan to win the ACT title for the first time since 2016.

Meg Lanning retires: A 'khadoos' legend who redefined the game and led Australia's path to domination

November 10,2023

Captaincy came early in Meg Lanning's career. In 2014, she was 21 when she was given the keys to unlocking the door to Australian domination. Responsibilities were placed on those shoulders when she was still a young batter who was just starting to take the women's game by storm. Perhaps that is why when she announced her international retirement, still only 31, she felt a sense of relief wash over her.

NASA telescopes discover record-breaking black hole

November 6,2023

Astronomers have discovered the most distant black hole yet seen in X-rays, using NASA telescopes. The black hole is at an early stage of growth that had never been witnessed before, where its mass is similar to that of its host galaxy.

Scientists produce yeast strain with more than half synthetic DNA in major breakthrough

November 10,2023

Scientists have accomplished a major milestone in the journey to creating complex cells with an entirely synthetic genome. Biologists created a strain of yeast which has a genome that is more than 50 per cent synthetic DNA. Half of the 16 chromosomes of the strain were designed and created from scratch.

Galaxy like Milky Way detected in early universe could challenge our cosmic knowledge

November 11,2023

Until recently, it was believed that barred spiral galaxies like the Milky Way cannot be observed before the universe reached half of its current age of 13.8 billion years. But now, scientists have used the James Webb Space Telescope to discover the most distant barred spiral galaxy to date.

China unveils bold plan to mass-produce humanoid robots by 2025

November 9, 2023

China has announced a grand vision to create and mass-produce humanoid robots that can perform various tasks and interact with humans. The country's Ministry of Industry and Information Technology (MIIT) published a blueprint document last week, stating that the humanoid robots would be as "disruptive" as smartphones and would "reshape the world."
