How the cartoon came to London

Monday, October 14, 2024

The cartoon was bought in Venice in 1762 by the Scottish brothers John and Robert Udny. By 1779 it had entered the collection of the RA and in 1868 it was moved to its new home in Burlington House, in Piccadilly. In 1962 the RA faced a funding crisis and, as a last resort, it sold the cartoon to the National Gallery for £800,000. There it was vandalised in 1987 when a man took a shotgun into the gallery and shot the Leonardo Cartoon at close range. This damage was carefully repaired by conservators.

Govt. includes 5 tribal art forms in school arts festival

Tuesday, October 15, 2024

The State government has included five tribal art forms in the school arts festival from this year. The tribal art forms newly included are Mangalamkali, Paniya dance, Malapulayattam, Irula dance, and Paliya dance. There were demands for the inclusion of these art forms in the school arts festival from tribal communities across the State.

Sharma finishes T-35 at Open de Espana

Thursday, October 17, 2024

India's Shubhankar Sharma finished tied 35th after carding a disappointing 71 in the final round of acciona Open de España golf tournament.

Sharma, who was T-2 after the second round following 66-66 on the first two days, had a rough weekend as he continued his chase to seal his berth in the season-ending DP World Tour Championship.

Matthieu Pavon powered to a maiden DP World Tour title in wire-to-wire style. The Frenchman arrived at Club de Campo Villa de Madrid with three runner-up finishes on both the European Challenge and DP World Tours but had never won a European Tour group event despite consistent performances.

We Are All Made of Cells: Space and the Immune System

Friday, October 18, 2024

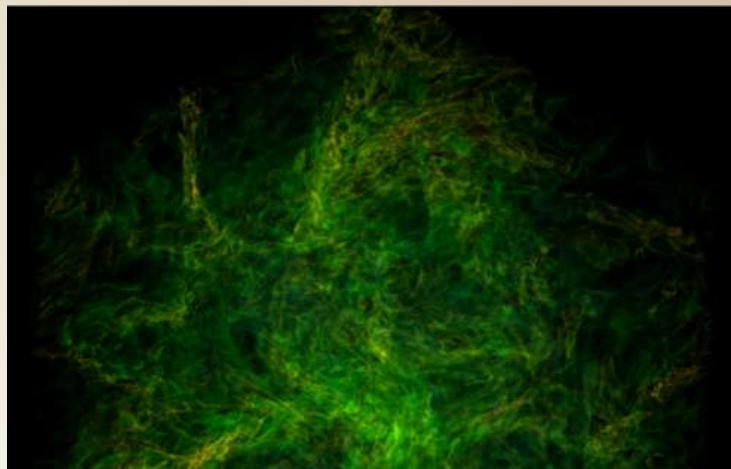

Malcolm O'Malley and his mom sat nervously in the doctor's office awaiting the results of his bloodwork. This was no ordinary check-up. In fact, this appointment was more urgent and important than the SATs the seventeen-year-old, college hopeful had spent months preparing for and was now missing in order to understand his symptoms.

NASA-Funded Study Explores Turbulence in Molecular Clouds

Saturday, October 19, 2024

On an airplane, motions of the air on both small and large scales contribute to turbulence, which may result in a bumpy flight. Turbulence on a much larger scale is important to how stars form in giant molecular clouds that permeate the Milky Way.

Bees Declared Most Important Organism on Earth Amidst Rapid Decline of Their Population

Friday, October 18, 2024

We all know how integral bees are to crop production and ultimately the global food supply, but now it has been made official: bees are the single most important species on the planet. According to the Earthwatch Institute at the last meeting of the Royal Geographical Society of London, bees are the most significant living organism on Earth. Seventy percent of the world's agriculture relies completely on bees, according to a recent study. However, along with the declaration, is a stark reminder of the impact humans are having on the n

New Crash Detection Feature Mistakes Rollercoaster Rides for High-Speed wrecks

Saturday, October 19, 2024

First responders have been showing up to amusement parks at an alarming rate because of one of the iPhone 14's new features. The iPhone 14's Crash Detection feature, which immediately alerts authorities when it senses excessive impact to the body, is calling 911 on rollercoasters. According to a report from The Wall Street Journal, the feature has had law enforcement sent to amusement parks on numerous occasions after mistaking a thrill ride's twists, turns, and hard braking for a real emergency.
